EMPLOYMENT HISTORY

CONCOURSE IT: RANDBURG

Position - Technical Support   (18 November 2019 – 1 January 2021)

Promoted - Business Intelligence Developer   (1 January 2021 – Current)

Sector - Short Term Insurance

Responsibilities as a Business Intelligence Developer:

° Collaborating and working closely with clients within multiple roles such as analysts, financial managers, general managers, CEO, and CTOs on their requirements for reports, data extracts, and or any bugs on our web applications.
° Developing, deploying, debugging, improving security and performance on databases, stored procedures, triggers, tables, views, or any other database object where needed using T-SQL or SSRS
° Migrating, transforming, and shaping data from sources to our databases.
° I maintained and updated our clients' websites by using HTML and CSS, I also designed legal letters in HTML for customers on demand.
° Designed and implemented reports in SSRS/PowerBI

Responsibilities as a Technical Support Agent:

° I wrote SQL scripts to debug database objects. I also had to approve SQL scripts submitted by junior agents before they were allowed to be executed by the Business Intelligence team.
° I had to manage a small team of junior support agents, making sure that they perform well, if they had any advanced issues, they would escalate matters to me.
° Participated in interviewing potential new employees by testing their database skills and provided training to new employees on both the UI and SQL.

Worthy mentions:

° I migrated our KPI system from Excel to Power BI by designing the report and writing the DAX required as well as retrieving, processing, and shaping the data into Power BI.
° I was assigned to our biggest client on the 3rd of June 2020 (Renasa Insurance Company limited) to work on their more advanced issues and bugs; after I sorted majority of their issues I got reassigned on the 29th of January 2021 to our newest clients (Safire Insurance Company Limited and Genoa Underwriting Managers) to do their migrations and work on their post-deployment issues.
° I developed and deployed over 550 T-SQL queries up to date including both DML | DDL | DCL | DQL queries and 150 data extracts.
